## Here's what some of the users of the service think:

“

I found the forms really confusing,  
I am glad Aisha helped me.

I could understand what she was saying to me and there was no need to shout as she was very clear when she spoke and very understanding. I like the idea of a house visit as it's private and no one needs to hear what you are saying.

Very thorough and extremely understanding. I couldn't have done it without her.

Extremely knowledgeable and very good at explaining everything. She provided a very valuable professional service.
